

CONTENTS OF ISSUE 3-4 VOL. XLVI

V.I. LYSENKO, <i>Experimental research on stability and transition in high-speed wakes. Part 1. Research on the transition position in supersonic and hypersonic wakes and the effects of temperature and other factors</i>	243
V.I. LYSENKO, <i>Experimental research on stability and transition in high-speed wakes. Part 2. Influence of parameters of supersonic free flow on development of disturbances in a wake</i>	251
V.I. LYSENKO, <i>Experimental research on stability and transition in high-speed wakes. Part 3. Influence of thickness of a flat plate and length of its stern on stability of a supersonic wake</i>	261
A.I. ISMAIL, T.S. AMER and M.O. SHAKER, <i>Perturbed motions of a rotating symmetric gyrostat</i>	271
F. THIEBAUD, B. GABRY and C. LEXCELLENT, <i>Mechanical characterisation of the interface between a shape memory alloy fiber and a resin epoxy matrix</i>	291
M. MEYWERK, <i>Rumbling in high speed passenger trains</i>	315
J. HOLA, <i>Studies of failure of high-strength concrete</i>	333
